

MaxX TG

New

Hand controlled magnetic lifters for thin gage ferrous loads

The easiest, safest and most efficient way to handle low thickness sheets and tubes

POWERFULL - STRONG - COMPACT

MaxX TG 150

**SAFETY
FACTOR 3**

MaxX TG 300

TECNOMAGNETE®

Safety through Power

Maxx tg the evolution of the species

The special design of the polar surface together with a proper balancing of the magnetic masses located in the stator and in the rotor, has enabled to achieve an optimal concentration and distribution of the magnetic strength all over the contact area of the load, and thus allowing an easier rotation of the handle whilst keeping the characteristics of safety and reliability of all the maxx lifters unchanged.

- solid block construction
- high power rare heart permanent magnets
- special treatment on all surfaces for corrosion and wear protection

unit lifting from stack

pipe lifting

special poles configuration

skimming from 4 mm

Force - Air-gap

Performance curves with changing load thickness (plate)
